

VisionX IP Lab: Hands-on Patentability Workshop Successfully Conducted!

RVEI Incubation Foundation successfully organized the **VisionX IP Lab: Hands-on Patentability Workshop**, on **20th July 2026**. It was an engaging and practical learning session aimed at helping startups and student innovators understand the importance of Intellectual Property (IP) and patent protection.

The workshop was led by **Mr. Prakash Balekundri**, Founder of UniqPatents Consulting and former Patent Head at ISRO, Bosch, and Qualcomm. Through an interactive **hands-on training session**, he guided participants on:

- ✓ Understanding the fundamentals of patents and Intellectual Property Rights (IPR)
- ✓ Identifying patentable innovations
- ✓ When and why to file a patent
- ✓ The patent filing process in India
- ✓ Prior art search and patentability assessment
- ✓ Common mistakes to avoid while protecting innovations

Rather than being a conventional lecture, the workshop provided participants with the opportunity to evaluate their own ideas, ask questions, and gain practical insights into transforming innovations into protected intellectual assets.

This impactful session was organized under the guidance of **Dr. Lakshmi Jagannathan, Incubation Architect and Head, RVEI Incubation Foundation**, whose vision and leadership made this initiative possible. The workshop was coordinated by **Mrs. Lekhashree B R, Incubation Manager, RVEI Incubation Foundation**, ensuring the successful planning and execution of the programme.

We extend our heartfelt gratitude to **Mr. Prakash Balekundri** for sharing his vast industry experience and practical knowledge, and to all the VisionX and VentureX participants for their enthusiastic participation and active engagement.

At RVEI Incubation Foundation, we remain committed to empowering innovators with the knowledge, skills, and mentorship needed to transform ideas into impactful ventures.
